

Barriers to Education:

Identifying key indicators to
improve student attendance in BARMM

Figure 1. Incidence (%) of out-of-school children aged 5–15 years, by region and sex: Philippines, 2017

ARMM and its neighbor provinces reported a **higher than average dropout rate** in the country.

- Albert, David, Vizmanos, 2018

Disruptions to schooling caused by **lack of interest, cost of education, access to basic needs, displacement, and conflict** may result in declines in student attendance, and eventually student performance as well.

OBJECTIVES

MACHINE LEARNING MODEL

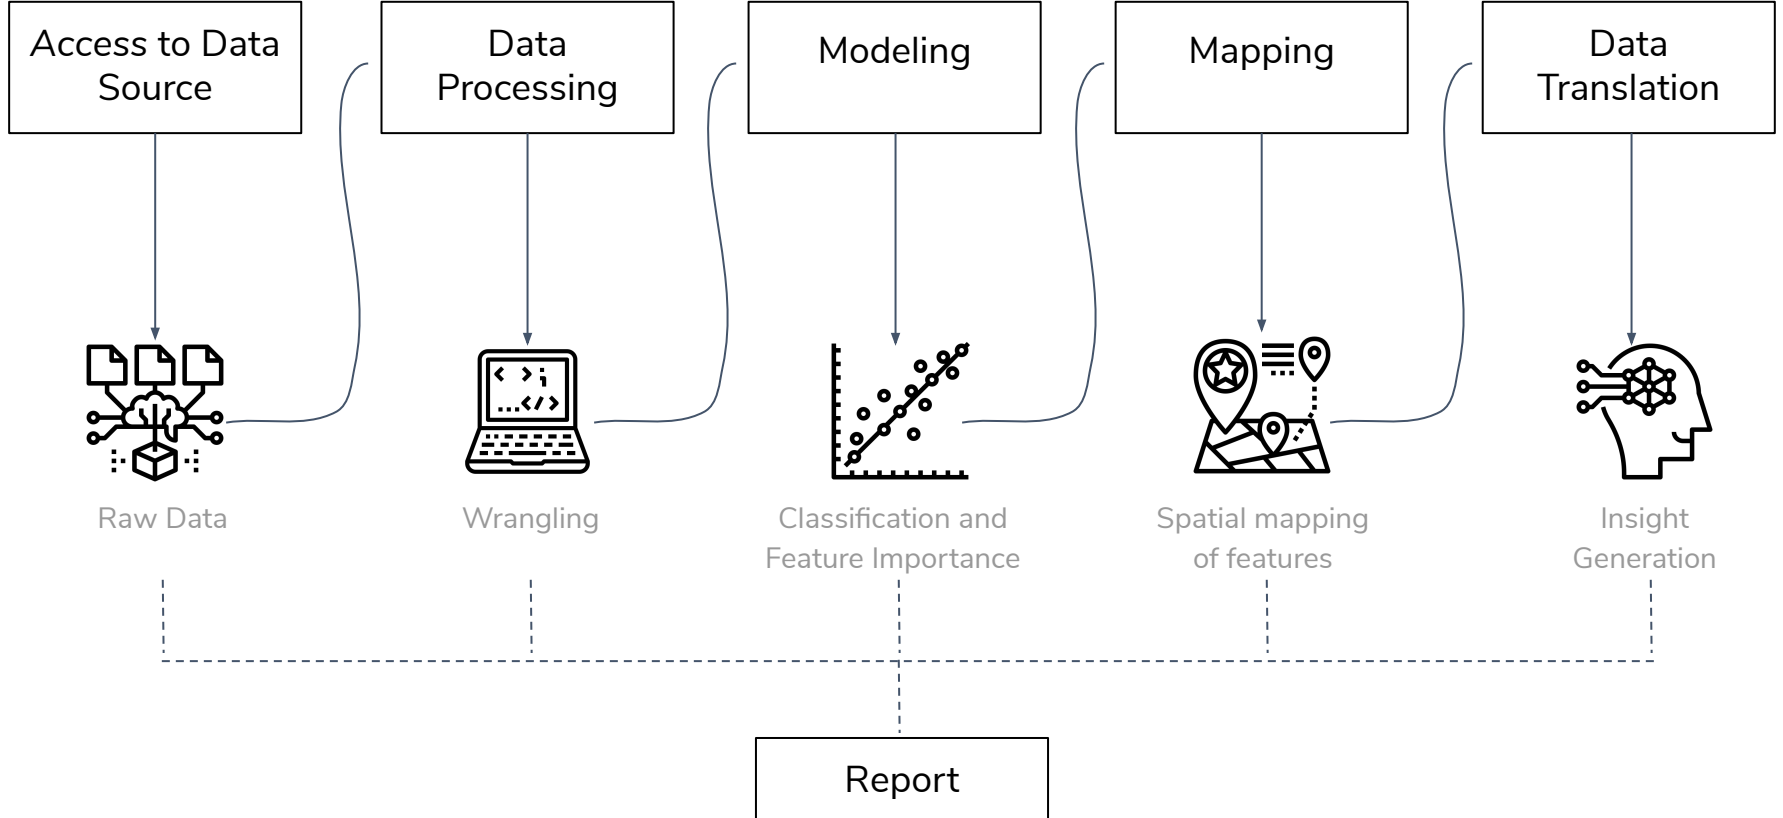

Which will identify the key factors causing the dropout.

INTERACTIVE MAP

That will provide as a storytelling guide for data communication and policy translation.

METHODOLOGY

DATA SOURCES

Open Bangsamoro

- Barangay Geographical Boundaries
- Number of Schools
- Working Population

FLEMMS 2015

- Household data

Department of Health

- Count of Health facilities

ACLED

- Locations of armed conflicts
- 

RESULTS

**Having a copy of Birth Certificate,
Having an environment for youth
labor,
Living in concrete homes, are the
top three indicators of school
attendance.**

Married Proportion (6-24 yrs. old) in BARMM

Married Proportion (6-24 yrs. old) in Maguindanao

CONCLUSION

Education is not recognized as a priority
by the people of BARMM due to having
more urgent things to address so they can
survive their everyday life and fulfill their
basic needs.

RECOMMENDATIONS

1. **Methodology** - Add Environment Data and Armed Conflict Information
2. **Education** - requirements for school admissions like birth certificates and the like must be more accessible to the people.

RECOMMENDATIONS

3. **Policies** - Further studies on social, economic, and cultural context should be conducted to come up with a more appropriate education system for BARMM.
4. **Geographic Dashboard** - Policymakers and stakeholders can utilize this dashboard to know where, when, and how they would set their priorities in improving student retention rates in the region.
